

JOB DESCRIPTION - SAP Hybris Commerce Developer – EX

We are looking for SAP Hybris Commerce Developer - Expert, with 5+ years of experience with an advanced level of English to work with us in a great US / Global project.

Work time is from 08:00 to 17:00 CST and following US Holiday calendar.

Position a 100% remote!

Your responsibilities will be:

- Serve as the SAP Commerce (Hybris) Back Office technical development Lead for all e-commerce solutions.
- Serve as the SME on the back-end development team with an understanding of the platform storefront development.
- Lead and participate in the technical design, development, and deployment of SAP Commerce Cloud (Hybris) to support business initiatives. This includes architecting, designing, and building the technical solution as well as the customization, extension, and implementation of integration with third-party software products.
- Customize the platform's storefront accelerator to build fully functioning e-commerce sites.
- Develop detailed system design documents to support system requirements and comply with quality standards.
- Conduct technical SAP Commerce Cloud (Hybris) design reviews with Commerce team members.
- Create and manage technical design documentation.
- Lead, evaluate, develop, test, and implement the release of system changes according to quality procedures.
- Track, monitor, review, and report on planned task status where appropriate.
- Manage technical integration points such as customer data, product data, pricing, and CMS systems.
- Recognize, analyze, and solve system or applications problems as they are encountered.
- Provide technical SAP Commerce Cloud leadership in projects and rollouts of the application.
- Manage deployments and manage codebase according to sprint/deployment structure.
- Consistently deliver high-quality service and solutions that meet business requirements and ensure goals are accomplished in line with business objectives.
- Share ideas, information, knowledge, and data proactively to accomplish collaboration for the success of the team, project, or task.
- Provide technical leadership, guidance, and education to other team members and service providers.

Who you are:

- Bachelor's degree. Experience with SAP Commerce Cloud on Public Cloud may be considered in lieu of degree.
- At least 5 years of progressive application development and integration experience, supporting medium to larger-sized UX applications.
- 2+ years of experience with SAP Commerce Cloud (Hybris).
- 2+ years of experience with cloud-native application deployment.
